EDUCATION

California State University, Sacramento | Sacramento, CA May 2027

B.S. in Computer Science | GPA: 3.8/4.0 Dean's List

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, HTML, CSS, C, Assembly, Bash, SQL

Technical Tools: React/React Native, Spring Boot, REST APIs, PostgreSQL, Docker, Git, GitHub, Vercel, Render

AI & Operating Systems: GitHub Copilot, ChatGPT, Windows, Linux, macOS

RELEVANT EXPERIENCE

CSUS Division of Information Resources & Technology | Sacramento, CA August 2026 - Present

IRT Instructional Materials Student Intern

- Remediated PDFs, Word Documents, PowerPoint presentations, and Canvas content to improve accessibility for students with disabilities, applying WCAG 2.1-aligned guidelines and document-accessibility best practices
- Identified, resolved, and verified accessibility issues using Adobe Acrobat Pro, CommonLook PDF, UDOIT, and built-in Microsoft Office and Canvas accessibility checkers
- Managed remediation requests through ServiceNow and Microsoft Teams, tracking project progress, communicating updates to faculty and staff, and assisting with video-captioning requests

PROJECTS

INSTEA Web & Mobile App | Final Senior Project October 2026 - Present

- Developed a full-stack ordering and loyalty platform using React, React native, Sprint Boot, and PostgreSQL
- Built responsive web and mobile interfaces for menu browsing, product customization, checkout, and pickup scheduling
- Integrated Square for secure online payment processing
- Implemented customer accounts, order history, QR membership cards, loyalty points, rewards, and digital stamp cards
- Created a secure web-based administrative dashboard for managing orders, products, customers, promotions, and rewards
- Designed RESTful APIs to connect the website, mobile application, and PostgreSQL database
- Collaborated with a senior project team of 6 to gather client requirements, design system architecture, and estimate cloud infrastructure costs

Zero Waste Game | CS131 Project October 2025

- Collaborated with a team of 6 to update and modernize the Zero Waste Game website, ensuring full ADA compliance and improved accessibility for all users
- Updated and refactored the Zero Waste Game website to meet ADA and WCAG 2.1 accessibility standards
- Ensured responsive and inclusive design across devices and browsers
- Used GitHub for version control, collaboration, managing branches, and pull requests

EXTRACURRICULAR EXPERIENCE

MESA Member | Sacramento State August 2023 - Present

- Engaged in an academic program focused on hands-on, project-based learning in STEM fields
- Gained exposure to industry professionals and academic pathways in engineering and technology
- Participated in workshops and mentorship sessions to improve coding and communication skills
- Developed leadership and teamwork skills through collaborative group projects and presentations
